

Advanced Logistics And Planning System (ALPS)

Features of ALPS system

C. V. DESIGNERS

Contents

- Introduction..... 03
- ALPS Features.....04
- Reports.....33

Introduction

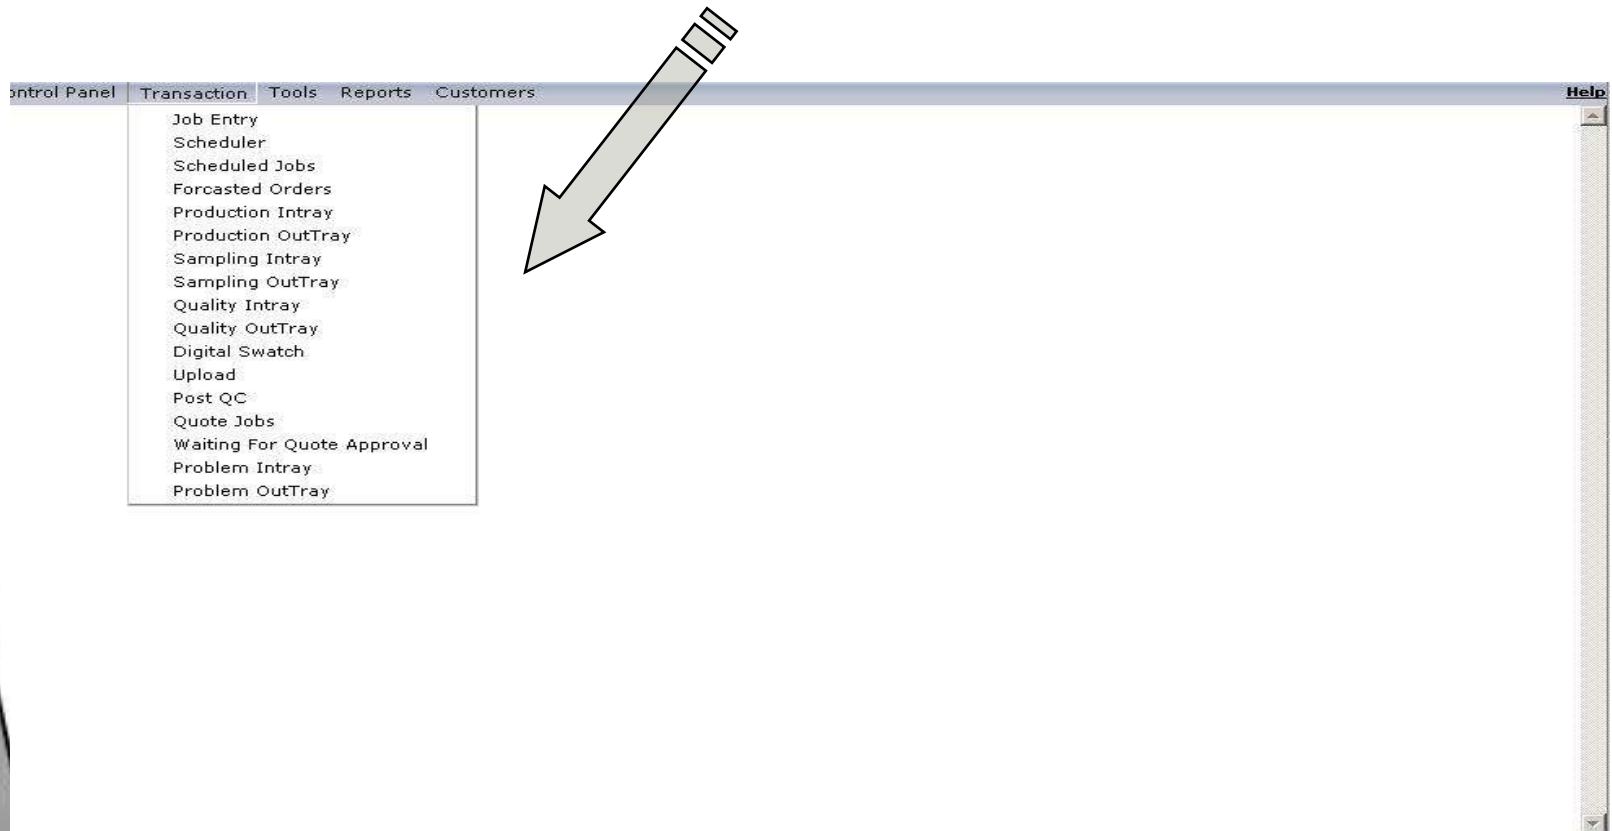

- Advanced Logistics And Planning System for entering, handling & routing of orders.
- Easy & Faster Order Submission Process.
- Access to Live Information regarding orders.
- Better Order Archiving & Retrieval System.
- Single system for all information.

Features-Menu

- Dynamic menu generation depend on employee role.

Features-Job Order Entry

- Dynamic job entry according to job type & customer

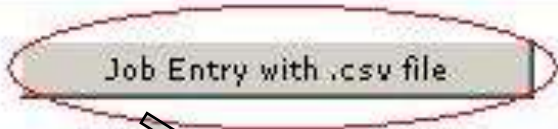

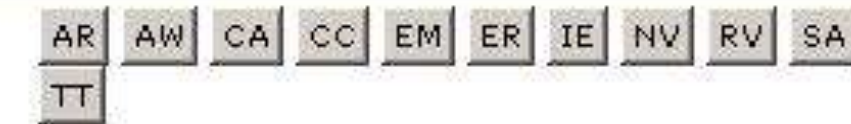

Select job type with the help of these buttons.

Attach Input Files

System Fetches all data from reference job.

Features

- Automatic Job ticket printing after job entry.
- System takes input stage wise, customer wise & job type wise (take dynamic input from user) while proceeding from one stage to other stage.
- Attach only those files which are having valid extensions.
- Download files in zip format.
- Dynamically shows some billing parameters, depend on product.

Features

- Filtration & sorting on job priority.
